

AccuView LED Machine Light

Better lighting means increased productivity.

Accu-Tech LED Machine Center Lights replace outdated fluorescent and incandescent lights in machine centers with clean, 5000K daylight white for improved visual acuity.

State-of-the-art LED technology ensures a minimum 50% energy saving compared to fluorescent lighting and, unlike fluorescent tubes, ensures a constant light output over the time!

- State-of-the-art LED technology offers 50,000 hours of maintenance-free operation
- Diffused high impact acrylic lens eliminates annoying LED pixelization and glare reducing eye strain
- 5000K color temperature for increased visual acuity
- Sealed assembly resists cutting fluids and lubricants
- 120-277 VAC remote mounted driver/power supply
- 9 ft. oil and water-resistant cord with liquid tight strain relief
- Remote mounted power supply included
- Two Brackets are required per fixture (not included)
- Optional Accu-Shield protective self-healing replaceable film
